Education

Yeshwantrao Chavan College of Engineering, Nagpur
B.Tech — Electronics Engineering | Honor: VLSI Design

CGPA: 7.77

Skills

Languages: Python, JavaScript, C/C++, HTML, CSS, SQL
Technologies: Machine Learning, Deep Learning, Generative AI, LLMs, Agentic AI, Computer Vision, OOP
Frameworks: Flask, FastAPI, React, Vite, Node.js, Next.js
Tools: VS Code, Google Colab, Anaconda, Ollama, MySQL, Git, GitHub, Postman, ESP32, MQTT
Libraries: OpenCV, TensorFlow/Keras, Scikit-learn, face-api.js, Tkinter, YOLOv8, Leaflet.js

Experience

Junior Software Developer — Prevoyance IT Solutions Pvt. Ltd. Jul 2026 – Present
– Develop full-stack tools using FastAPI and React, including monitoring and compliance dashboards with automated PDF reporting.
– Build LLM-based pipelines using FastAPI and locally hosted models (Ollama) to automate documentation-to-QA workflows.

AI/ML Intern — Prevoyance IT Solutions Pvt. Ltd. Jan 2026 – Jun 2026
– Developed real-time computer vision models using CNN, YOLOv8, and OpenCV, covering dataset preprocessing, training, and hyperparameter tuning.
– Built and deployed edge AI detection systems integrated with IoT sensors and live dashboards.
– Contributed to machine learning, full-stack web, and ESP32-based IoT solutions.

Freelance Full-Stack Developer — ConvoSec AI & Perfionix AI 2026
– **ConvoSec AI:** Full-stack learning platform (React, Express, SQLite, JWT auth); deployed on Vercel and Render.
– **Perfionix AI:** Next.js 14 product-showcase site with Spline 3D hero and Framer Motion; 92+ Lighthouse score.

Projects

JARVIS — Offline Desktop AI Assistant 2026
– Voice-enabled offline desktop assistant (FastAPI, React/Vite, Ollama, Vosk) with wake-word activation, OCR vision, and app automation.

CodeFix — AI Autonomous Debugger 2026
– Online IDE for 10+ languages that feeds live runtime stack traces into local LLM prompts to generate accurate fixes.
– Benchmarked 5 Ollama models for structured output and traceback reasoning; sandboxed code execution via Piston API.

ResumeAI — ATS Resume Analyzer 2026
– Resume analyzer with ATS scoring, domain detection, and improvement tips; dual engine (Groq cloud or offline Ollama) with PDF/DOCX/OCR parsing (React, pdf.js, Tesseract.js).

Github-Reposcan — AI Repository Scanner 2026
– Built a SonarQube-style scanner combining static analysis with local LLM triage, streaming progress via SSE, with an in-browser IDE and AI chat (FastAPI, React, Vite, Ollama).

Research Publication

IEEE ICETEMS 2026 — Paper Presentation Mar 2026
– Presented “Sign Language Translator using ML Algorithms on RGB Color Space” at the **3rd International Conference on Emerging Trends in Engineering and Medical Sciences**, IEEE Maharashtra Section, YCCE.
– Demonstrated RGB color space superiority (90% accuracy) over Greyscale (~40%) and HSV for real-time ASL recognition using CNN + YOLOv8.

Certifications

– **Claude 101** — Anthropic, 2026 — **AI Appreciate & AI Aware** — Intel AI For All, Feb 2026 — **Generative AI for Beginners** — Simplilearn, Apr 2026

Achievements & Activities

– **Kaggle Datasets Expert** — Rank **235 / 11,768** worldwide (Top 2.0%); 3 Silver, 1 Bronze medals; highest rank **217**.
– **Kaggle Notebooks Expert** — Rank **2,363 / 60,513** worldwide (Top 3.9%); 5 Bronze medals; highest rank **2,271**.
– **Chrome Web Store Publisher** — 5 extensions, 950+ total installs: *BalanceTab* (320+ installs, 5.0 rating), *TimeMark* (280+ installs, YouTube timestamps), *Growth Tracker* (240+ installs, behaviour tracker + site blocker).
– **Event Head, RoboRace** (ICON, YCCE); Nagpur District chess player, State Level (Class 8).
